

Rider Notice

8/5/09

FOR ANYONE WHO RIDES TO THE U OF M

Beginning Thursday August 6, 2009, a truck will be taking soil samples along Washington Ave. on the east bank campus of the U of M for the proposed light rail construction.

Some of the soil boring locations will be right at the bus stops and our buses will not be able to stop. If you see equipment blocking a stop, please walk to the next open bus stop where you'll be able to board safely.

Drilling should take about 5 days to complete.
